91120 Palaiseau/France

COMMITMENT TO CONFIDENTIALITY

*Subject, where applicable, to the provisions of the contract providing for my employment in the
Laboratory.*

I, the undersigned
born on at of nationality residing
in
and will be working at the UR INRAE Bioger

du

au in the capacity of

Acknowledge that I am bound by professional secrecy with regard to all third parties, not only concerning the Laboratory's activities, whether in terms of research as such, services or interactions with private partners, but also concerning those of which I may become aware, particularly during meetings or visits to other research units in France.

I hereby undertake to treat as strictly confidential all information in any form whatsoever of which I may become aware during or on the occasion of my stay at the Laboratory and to use such confidential information solely for the purposes of carrying out my activities at the Laboratory, until such information falls into the public domain.

I acknowledge that I may only make written or oral publications or communications relating to work carried out at the Laboratory with the authorization of the team leader or Unit Director during the duration of my contract and for 24 months following its expiry. Publications or communications will be subject to the approval of the Unit Director or his deputy and must explicitly mention the names of the Laboratory and its supervisory bodies (INRAE).

I acknowledge that the results of the work carried out at the Laboratory, whether patentable or not, including software, are the full and complete property of the Trustee Institutions, which may therefore file patents in their names and at their expense to protect the resulting inventions. These Trustee Companies undertake to mention my name, unless I object, if I am considered to be one of the inventors. I will, under all circumstances, lend my fullest support to the application and maintenance of the said patents, as well as to their exploitation both in France and abroad.

I accept that publication may be postponed in the event of patentable results, without being able to invoke any prejudice or compensation.
